ANSHUL AWASTHI

Associate Product Manager | B2B SaaS | Product Discovery & Execution

New Delhi, India | +91-8130590671 | anshulawasthi99@gmail.com | linkedin.com/in/anshul-awasthi-2559b5175

SUMMARY

Associate Product Manager with 3+ years of experience building B2B SaaS products, from understanding customer problems to defining features and working with engineering teams on delivery. Progressed from Product Analyst to APM at ManufApp, with experience in customer discovery, prioritisation, product analytics, and simplifying complex workflows.

EXPERIENCE

ManufApp **New Delhi, India | Jun 2023 – Present**

Associate Product Manager Apr 2026 – Present

- Led the development and launch of a vendor collaboration and order tracking platform, from customer discovery and workflow design to testing and release. The platform is now used by **15+ companies** to track orders, deliveries, material losses, and vendor performance.
- Reduced vendor selection time from **20–30 minutes to 1–2 minutes** by bringing vendor workload, order status, and delivery performance into one place, replacing manual spreadsheet checks and repeated follow-ups.
- Shortened requirement documentation time from approximately **5 days to 2 days** by creating clearer PRDs, process flows, user stories, and acceptance criteria for engineering.
- Manage product requirements and roadmap priorities across an enterprise SaaS platform covering planning, operations, inventory, quality, and integrations.
- Work with engineering and design teams on sprint planning, scope decisions, and releases, delivering approximately **90%** of committed sprint scope.
- Conduct customer interviews, factory visits, and stakeholder workshops to identify workflow problems and prioritise improvements.

Product Analyst Jun 2023 – Mar 2026

- Built and validated **10–15** workflows, dashboards, and internal tools using rapid prototyping, shortening validation cycles from **2 weeks to 2–3 days**.
- Developed an inventory reconciliation tool that cut the time needed to check discrepancies from approximately **60 minutes to 5–6 minutes** by automatically identifying stock mismatches.
- Analysed product and operational data using SQL and Excel, building dashboards to identify issues and inform product decisions.
- Worked with customers and internal teams to document requirements, workflows, user stories, and integration needs; created Figma prototypes and supported UAT with engineering and QA.

CNH Industrial **Greater Noida, India | Jun 2022 – May 2023**

Graduate Apprentice Trainee — Continuous Improvement

- Worked with the Plant Head on Kaizen Week planning, shop-floor reviews, and the rollout of daily management processes.
- Prepared monthly operations review presentations and APAC KPI reports to support operational reviews and capital expenditure decisions.

SKILLS

Product Management: Discovery, Roadmapping, Prioritisation, PRDs, User Stories, Acceptance Criteria, Backlog Management, Agile Delivery, Sprint Planning, UAT

Analytics: SQL, Excel, Product Analytics, KPI Tracking, Feature Adoption Analysis, Dashboards

Design & Tools: Figma, Jira, Trello, Claude Code, ChatGPT | **Domains:** B2B SaaS, Enterprise Software, MES, ERP Integrations

Research & Collaboration: Customer Interviews, Stakeholder Workshops, Usability Testing, Process Improvement

EDUCATION & RECOGNITION

MBA, Project Management — Dr. D.Y. Patil University, Pune | 2024–2026

B.Tech, Mechanical Engineering — Sharda University, Greater Noida | CGPA: 8.89 | 2017–2021

Design Patent Holder — Electric Hub-less Motorcycle | **Platinum Award** — 7th CII National Competition, Poka-Yoke (LCA Category)
